If you think

your **DIGITAL TRANSFORMATION** will be **TOO RISKY** and **TOO EXPENSIVE**

Think again.

*Actual customer results.

AuraPlayer transforms any enterprise back-end, legacy system, or SAAS application to a digital experience, such as mobile or Chatbot, in days, securely, and without redevelopment.

Now organizations can make digital transformations while keeping their fully-functioning enterprise application code!

- **No** back-end redevelopment costs.
- **No** risk to production environments.
- **No** costly or lengthy implementations.
- **No** need to purchase additional hardware.
- **No** restrictions on deployment platforms or UI development tools.

A new and improved user interface and digital experience in record time!

How Can We Help?

- Extend to the cloud while securely reaching on-premise applications.
- Improve user experience (UX) without compromising the back-end.
- Mobilize business applications in days, not months.
- Use natural language to Query your back-office systems.
- Automate your QA, monitoring and test cycles (Enterprise-grade QA).
- Monitor your Oracle Forms / EBS system health and receive real time alerts.

AURAPLAYER
BE AGILE. GET CONNECTED. GO MOBILE

AuraPlayer provides the best of both worlds

1 AuraPlayer can quickly and easily create mobile versions of your Oracle Forms, EBS, JDE, PeopleSoft or other enterprise back-end business processes without redevelopment or migration.

2 Not quite ready for mobile? How about a "facelift" to modernize the look and feel, design or color scheme of your existing systems?

Modernize your user interface using ANY development technology, such as Oracle Visual Builder Cloud Service (VBCS), Ionic, Angular, React, APEX, HTML5, .Net or run without an interface from any BPM, SOA process or integration project.

Why AuraPlayer?

- ✓ **Go Mobile** - The same application on the desktop and on the go.
- ✓ **Reduce Development Time** - Do in hours what usually take months to develop.
- ✓ **Decrease Maintenance** - Use existing business logic - only one code base.
- ✓ **Minimize Risk** - No migration / redevelopment of the back-end required.
- ✓ **Get Cloud Ready** - Plug into the Cloud with AuraPlayer's API integration wizards.
- ✓ **Maximize ROI** - All of the above for a minimal monthly subscription fee.

Hear what our cutomers are saying!

THE NEW AMIDAR

" We discovered a treasure. AuraPlayer put our big, legacy Oracle Forms back-office system into the palm of our hands, accessible anytime, anywhere! "

– Rachel Lublianker, IT Director

FUJITSU

" Modernizing Oracle EBS forms using mobile apps without writing a single line of code or making any change to forms sounds unrealistic. But, I am so happy to have been able to do it. AuraPlayer offers a seamless solution to achieve this digitization."

– Vishal Goyal, Program Manager

MTA

" We needed a way to quickly deliver mobile business apps to our employees today using our existing systems. We're hoping this will be a steppingstone for all future and even more complex mobilization projects."

– Dylan Ganepola, Director of IT, Bridges & Tunnels
(As said to Forbes Magazine)
